

R2110

High Speed Smart 5G RedCap Router

4 x Ethernet + 1 x RS-232 + 1 x RS-485

INTRODUCTION

The Robustel High Speed Smart 5G RedCap Router (R2110) is a rugged cellular router offering state-of-the-art mobile connectivity for Internet of Things applications.

R2110 is a powerful platform developed based on **RobustOS**, a Robustel self-developed and Linux-based operating system which is designed to be used in Robustel devices. The RobustOS includes basic networking features and protocols, providing customers with an excellent user experience. Meanwhile, RobustOS offers Software Development Kit (SDK) that allows partners and customers to develop IoT applications by using C and C++. It also provides various Apps to meet fragmented IoT market demands.

The **Robustel Cloud Manager Service (RCMS)** is a unified cloud-based platform designed for real-time monitoring and centralized management of industrial IoT devices. Fully compatible with Robustel routers and gateways, RCMS delivers an interactive geospatial dashboard that enables users to visualize device locations and track critical metrics such as data usage, signal strength, and network status. To ensure seamless operations, the platform facilitates over-the-air (OTA) updates for firmware, configurations, and applications, minimizing downtime while optimizing system performance.
